To whom it may concern

This is to inform that Miss J.A Jayathree Karunaratne is under my follow up for sero-ve Inflammatory Arthritis (? Enteropathic Arthritis) since 2020 for 4/09.

She also gives a background history of Ulcerative colitis for whic she is on GI follow up.

Currently her arthritis is in remission with Sulphasalazine 1g bd.

This letter was given on Miss J.A J. Karunasuriya request.

Many Thanks

කරුණාකර නැවත පැමිණෙනවිට මෙය රැගෙන එන්න.

HISTOPATHOLOGY REPORT

Ref No: **2680-20**

Name: Miss. Jayathri karunasinghe.
Age: 20 years
Sex: Female (BHT- 5280)
Referred by: Dr. Chamila Kumara Ranawaka. Consultant GI Surgeon.
Date: 01.12.2020

Specimen: Colonoscopic mucosal biopsy from inflamed rectum, sigmoid colon and transverse colon.

Macroscopy:
Two linear fragments of mucosal tissue.
Largest measure 1.0cm in length.

Microcopy
The mucosal biopsy shows focally distorted crypt architecture and goblet cell depletion.
Focal atrophic crypts are seen.
Full thickness of mucosa shows dense plasma lymphocytic and neutrophil infiltrate with focal cryptitis. Crypt abscess formation is noted.
Features favours Crohn's colitis including lymphoid aggregates, fissuring ulcers or granuloma are not seen.

Conclution
The features are consistent with active ulcerative colitis.
The biopsy is negative for epithelial dysplasia.
